

Interactive Use of Digital Tools in Education

COURSE SUMMARY:

This course is aimed at all teachers and staff working with learners in both formal and non-formal contexts. The course is an opportunity for teachers to (further) develop the digital skills necessary to work with learners in a new and modern way, using modern technologies and interactive digital tools.

Teachers participating in the course will be able to learn and employ a variety of digital tools that focus on increasing the motivation and participation of learners, with the primary objective of making their lessons more engaging and interactive.

Emphasis will be placed on tools that can be used to create a relaxed and welcoming learning

environment for learners, as well as tools to increase learner interaction and communication.

This intensive program imparts advanced proficiency in utilizing digital tools for effective teaching, encourages creative instructional approaches, provides strategies for inclusive learning and equips participants with practical tools to engage and motivate learners.

TARGET GROUP(S):

- teachers working with all types of learners in both formal and non-formal context
- staff in educational institutions
- teacher trainers
