## Join the NEB VET Label project: a unique opportunity for Vocational Education and Training centers!

Dear Reader,

We are excited to introduce a pioneering initiative aimed at **Vocational Education and Training (VET) centers**, which seeks to **promote the integration of the core values and working principles** of the [New European Bauhaus \(NEB\) initiative](#) into educational and training activities.

Thanks to the support of ErasmusPlus, [the NEB VET Label project](#) is developing a certification for **VET centers**, recognizing their commitment to providing **sustainable, inclusive, and beautiful** education. Whether it's improving facilities, learning methods, or fostering innovative projects, we aim to help VET centers achieve and maintain standards of excellence aligned with NEB values.

### The consortium and the international network

The NEB VET Label project is being implemented by a European consortium of 6 partners from 5 countries

- [Odyssea](#) (Greece)
- EUROCERT (Greece)
- [HVL - Western Norway University of Applied Sciences](#) (Norway)
- [EGInA](#) (Italy)
- Dante (Croatia)
- [Know&Can](#) (Bulgaria)

This international collaboration allows us to bring together diverse perspectives and build a certification that will be applicable and beneficial to VET centers across Europe.

## An opportunity to grow together!

Let's start at the beginning: let's introduce the consortium!

We are happy to share with you the kick-off meeting photo we held in Athens, last April 2024 with all partners together, hosted by Odyssea.

The project has a twofold objective: developing a **certification** that highlights the achievements of VET centers and creating a **collaborative network** of centers across Europe. By joining this network, you will:

- **Share your experiences** with other centers and learn from their best practices.
- **Contribute to the development of the platform** that will guide centers through the certification process by testing it and providing valuable feedback.
- **Access practical resources** and guidelines to improve your center and prepare for the future NEB VET Label certification.

The specific criteria for the certification are still being developed, and together with the project consortium, we are working to ensure they cover various key aspects of training and organizational processes. Your contribution to testing and providing suggestions will be crucial in shaping the best possible approach!

## Final conference in Croatia

Another exciting opportunity for participating VET centers: **the top 20 centers** will have the chance to attend the **final project conference in Croatia**, where they can showcase their work

and connect with international experts in the field. This will be a unique opportunity to gain visibility and be part of a movement for innovation in vocational education.

## How to get involved?

1. **Join the network:** [click here to join us](#), receive updates, participate in platform testing, and get our newsletter with all the latest project news.
2. **Participate in platform testing:** centers will have the opportunity to test the platform that will guide them through the certification process and provide valuable feedback to improve the experience.
3. **Share and collaborate:** access the project forum to engage with other centers, exchange ideas, and discuss how to implement NEB values in educational settings.

**Don't miss the opportunity to be part of a European network that aims to transform vocational education and contribute to a more sustainable and equitable future.**
